PREPARED FOR JACOB HEWLETT-CASE · HEAD OF ORGANIC · TELUS

The day-to-day organic surface — every channel, every move, every Monday.

This is the operator's read of the AI answer surface, purpose-built for the person running organic day-to-day. Aggregate TELUS is **69/100** across the five AI channels — but that number is a lagging indicator; the query-level movers under it are what you run against this week. Per-channel scoreboard, this week's WoW shifts, the citation chain feeding each channel, and the operating moves ordered by ROI.

TELUS ACROSS THE FIVE CHANNELS · 30D

Gemini	76	*strongest*
Google AI Mode	76	*strongest*
Google AIO	72	*strong*
ChatGPT	66	*mid*
Perplexity	56	*weakest*

WEEK 16 · WHAT SHIFTED · OCT 12 – OCT 19

Panel-wide 72/100 (up 1 from 71). Biggest mover: SMB cost-effective wireless 58 → 48.

▼	**SMB cost-effective wireless** 58 → 48	*-10pp*
▲	**Flexible mobile data** 16 → 18	*+2pp*
▲	**TELUS 5G experience** 95 → 97	*+2pp*

01

The five-channel scoreboard

Share-of-answer for TELUS across the five AI channels, thirty days ending October 5. Aggregate held at 69 this week; per-channel breakdown below tells you which lanes need attention. The WoW band above is where your Tuesday allocation session starts.

Gemini

GOOGLE'S ASSISTANT

76 /100

600 RUNS · AVG POSITION 1.6

Google-family. Rewards **YouTube, Google reviews, structured data**.

Google AI Mode

SEARCH'S CONVERSATIONAL LAYER

76 /100

476 RUNS · AVG POSITION 1.5

Conversational Google. Compounds **traditional SEO** investment.

Google AIO

SEARCH'S ANSWER BOX

72 /100

477 RUNS · AVG POSITION 1.7

Google AI Overview. Rewards **snippet-shaped content, schema**.

ChatGPT

MAINSTREAM BUYER SURFACE

66 /100

600 RUNS · AVG POSITION 1.6

Widest reach. Rewards **Reddit + Wikipedia** citation depth.

Perplexity

RESEARCH-HEAVY SURFACE

56 /100

600 RUNS · AVG POSITION 1.5

Tech-adjacent buyer. Rewards **fresh citations, whitepapers**.

The 20-point read. The spread from Perplexity (56) to Gemini/AI Mode (76) is the story. Each channel is a different optimization stack — one team can't win them all with a single playbook. The channel-by-channel framing below is how your team's investment maps.

02

Each channel unpacked — who's on it, what wins it

Same measurement lens, per-channel view. This is how your team should map effort — different playbooks for different channels, like paid vs organic vs affiliate.

CHANNEL	SCORE	USER PROFILE · CITATION LOGIC	BEST-PERFORMING QUESTION	WEAKEST QUESTION	WHAT MOVES IT
Gemini	76	**Google's assistant user.** Skews Android, Google-Workspace, everyday consumer + SMB. Cites YouTube, Google reviews, Maps, structured data heavily.	Rural business reliability · TELUS 5G speed vs competitors · Business owner sentiment	Home-office wireline · Flexible mobile data	**YouTube content, Google review velocity, structured-data hygiene.** Same investments that lift Google SEO.
Google AI Mode	76	**Google search users who opted into conversational.** Broad consumer + SMB. Direct pull from Google's search index — SEO wins here first.	Reliability · rural service · 5G speed · customer service	Flex data · home-office wireline · SMB wireless	**Entity-optimized SEO, comparison-site presence, freshness signals.** Your search team's playbook, extended.
Google AIO	72	**Every Google searcher.** Highest-reach AI surface in Canada by user count. Snippet-formatted, cites 5-10 sources per answer.	Rural residents · business owners · positive TELUS customer service	Flex data · home-office wireline	**Snippet-shaped content, FAQ schema, cite-worthy authoritative pages.** Traditional SEO with GEO overlay.
ChatGPT	66	**Widest-mainstream surface.** ~500M weekly users globally, cross-demographic. Reddit-heavy citation logic. Wikipedia + top publishers as facts layer.	Rural reliability · TELUS satisfaction · positive service	Home-office wireline · flex data · SMB wireless · activation fees	**Reddit & forum presence, Wikipedia hygiene, mainstream press placement.** Not an SEO play — a discourse play.

CHANNEL	SCORE	USER PROFILE · CITATION LOGIC	BEST-PERFORMING QUESTION	WEAKEST QUESTION	WHAT MOVES IT
Perplexity	56	**Research-heavy, tech-adjacent, enterprise DM.** Prosumer, analyst, IT-buyer. Citations shown inline; freshness & authority weighted highest.	Rural residents · positive TELUS service · TELUS satisfaction	**Weakest across the board** — home-office wireline, flex data, activation fees, families	**Third-party evidence (OpenSignal, IDC), current comparison-site listings, technical whitepapers.** Cite-first mindset.

03

Two channels worth an operating decision this quarter

The 76 that compounds SEO investment (protect and extend), and the 56 that leaves a specific buyer profile on the table (close the gap).

COMPOUNDING CHANNEL

Google-family surfaces reward SEO investment 2×

Gemini (76) and Google AI Mode (76) both pull from Google's search index. Google AIO (72) does too. That means **every dollar of SEO investment TELUS makes — entity optimization, structured data, page authority, freshness — compounds into three AI channels simultaneously.**

Your search team already runs this playbook. The operating decision is whether to **add the AI-answer surface to their measurement rubric** so wins there are tracked and rewarded, or leave them uncounted while the team optimizes for classic SERP.

3	1,553	74.7
AI channels lift with SEO	weekly runs (Gemini+AIO+Mode)	avg score across the three

GAP CHANNEL

Perplexity's user profile is the enterprise buyer

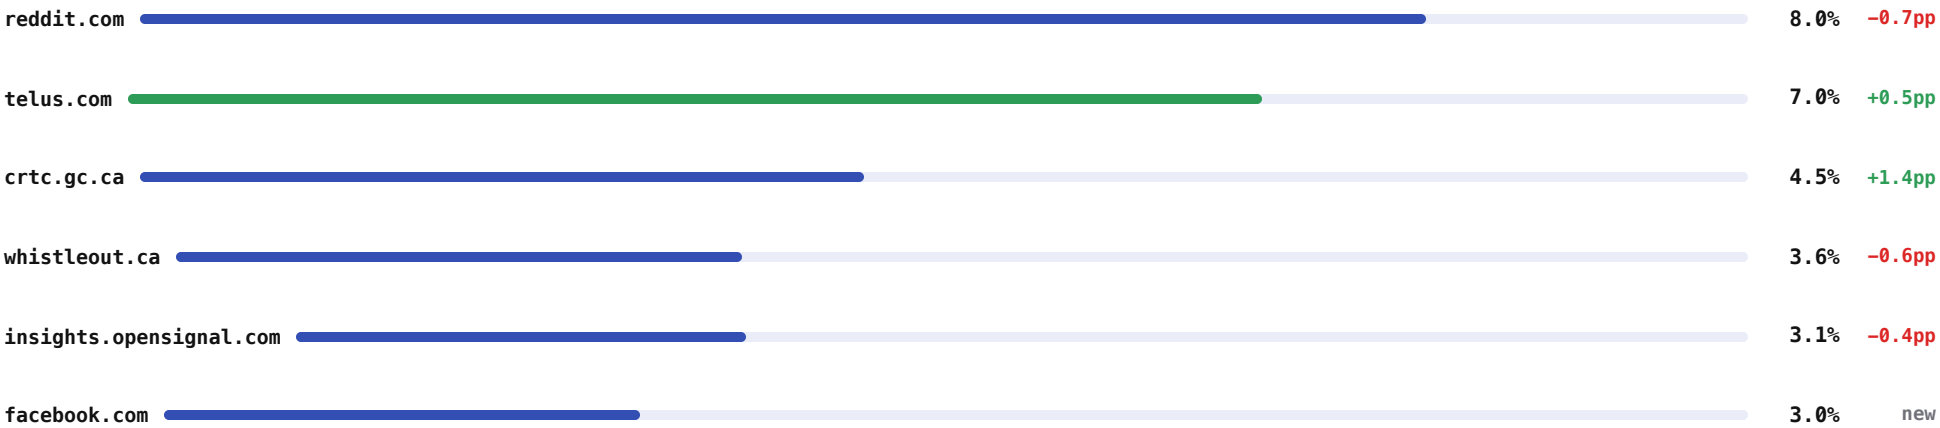

Perplexity's users skew **tech-adjacent, analyst, IT-decision-maker**. It's not a mass channel — but it's the one where SMB IT leads and mid-market decision-makers do research. TELUS at 56 versus 76 on Gemini means a specific buyer profile is seeing competitors more than TELUS in the answer.

Perplexity weights **freshness and authoritative citations** — recent third-party evidence, comparison-site listings, whitepapers, OpenSignal reports. Not Reddit-driven like ChatGPT. A distinct playbook, and one where your team can move the number inside a quarter with a focused push.

−20	Enterprise	70
points vs top channel	buyer profile	Q1 27 target

Share of citation sources · 30d

The share of all source citations the AI engines pull from when answering the 20 ICP questions. Tuesday-allocation input — the domains your Perplexity-gap and ChatGPT community plays compete against. WoW deltas against the prior stored snapshot.

Reddit partner since 2024 · Rahul can walk the operating lens on what moves inside r/CanadianTelecom, r/TELUS and r/canadianISPs whenever useful.

04

The weekly rhythm — what your team runs against the channels

Jacob's actual week. Monday-through-Friday cadence — this is how the organic team runs against the answer surface. Same instrument every week, five distinct operating lanes.

MONDAY

Automated pull lands

Panel refresh across all 5 channels · WoW deltas + query-level movers flagged inside 4h. **Nothing for you to do until Tuesday.**

TUESDAY AM

Allocation session

Read the WoW band. Assign this week's moves per channel. **SEO → Google-family. Community lane → ChatGPT. Analyst-relations → Perplexity.**

WEDNESDAY

Competitor delta

Bell moves flagged per channel. Same-day brief if a competitor gained >3 pts on a specific query. **Right now: Bell's Rogers-mobile climb is the tracking priority.**

FRIDAY

Operating brief up

One-pager to Rob + Kim. Per-channel score, this week's query movers, cited sources touched, intervention log. **Rob folds it into the Tuesday brief to Kevin.**

MONTHLY

Compound roll-up

Four weeks of query-level moves compressed to two pages. **What moved because we moved it — and what moved on its own.**

05

Five moves — one per channel

The interventions that shift each channel's score. Ordered by leverage against TELUS's current gap pattern.

	MOVE	CHANNEL	WHAT RUNS	TARGET
1	**Close the Perplexity gap with third-party evidence** Comparison-site refresh (WhistleOut, PlanHub), OpenSignal & IDC citations, TELUS Business whitepapers optimized for citation.	Perplexity	Cite-first assets · quarterly refresh	56 → 70
2	**Extend the SEO team's rubric to Google-family AI surfaces** Add AI Mode + AIO scoring to the SEO team's weekly dashboard. Entity optimization becomes AEO-aware.	Gemini · AIO · AI Mode	Rubric extension · no new headcount	74.7 → 82
3	**Fund a standing Reddit + community presence for ChatGPT** Community-manager retainer, subreddit engagement (r/CanadianTelecom, r/TELUS, r/canadianISPs), forum.telus.com content velocity.	ChatGPT	1 FTE / partner · discourse-shaping	66 → 75
4	**YouTube content sprint for Gemini** TELUS 5G, rural coverage, business testimonials as short-form YouTube. Structured product page schema alignment.	Gemini	Content sprint · Q4 launch	76 → 82
5	**Snippet-formatted FAQ content for Google AIO** Rewrite priority telus.com/business pages with FAQ schema, direct-answer paragraphs, entity clarity.	Google AIO	Content optimization · 6-wk sprint	72 → 80

Jacob's operating map

HEAD-OF-ORGANIC LANE

Five channels, five playbooks, one instrument. Your team runs the day-to-day; Rob folds the read into the Tuesday brief to Kevin; the exec PDFs consume the same underlying signal. **Position of maximum leverage:** you're the layer where the panel becomes weekly execution. Aggregate TELUS moves from **69 → 75** by end of Q1 27 if the five moves land as a coordinated program. **This scorecard is your working file.**

06

Methodology, for the room

The panel. 20 realistic Canadian-telco buying questions asked every Monday of 5 AI systems — ChatGPT, Gemini, Perplexity, Google AI Overview, Google AI Mode. Results appended to a durable, append-only tracking store. 16 weekly pulls on record.

Per-channel share-of-answer. For each AI channel, we count what percent of responses contain a substantive mention or citation of TELUS across the runs in the measurement window. A channel score of 76 means TELUS appears in 76% of that AI's responses to the tracked questions. Directly comparable across channels and across time.

Run counts. Gemini & ChatGPT run 600 responses per 30-day window; Perplexity 600; Google AIO 477; Google AI Mode 476. Different run counts reflect availability windows, not TELUS-side effort.

What this scorecard is not. Not an SEO ranking report. Not a paid-media dashboard. It's a measurement of how each AI channel currently recommends Canadian telco brands, treated as digital-channel operating input for the team that runs channels for TELUS.
